

Experience

[East Side Games](#)

03/2021 – Current

Idle games focused company where I work in Unity (C#) as a software engineer.

[SIDIA - Black River Studios](#)

12/2017 – 01/2021

Corporate size company where I worked in Unity (C#), creating prototypes, tools and various polished features for one VR and two mobile games. All in maintainable code with useful documentations for the team, and for project audit processes (as a project leader).

[Revolver Game Studio](#)

05/2014 – 12/2017

Worked as a generalist programmer and was involved in all parts of game development, delivered 4 projects for PC using Unity and Unreal Engine 4.

Game Projects

[Idle Idol](#)

Android | Unity

Generalist eng. from pre-production to project end. Worked with game 3C's, monetization, skins, server save, notifications, localization, UI, audio, optimisation etc.

[Magichestra](#)

VR - Windows Mixed Reality | Unity

Implemented two key aspects of the game, rhythm gameplay and gesture recognition system. Created a system to sync the environmental FX with the music, enabling higher quality visuals.

[Valgard and the Armor of Achilles](#)

Steam | UE4

Generalist programmer involved in all the game's parts regarding code. Implemented features like local co-op, weapons, characters, enemies, particles effects, level behaviors, audio, etc.
